

Homework 9

Due in class Thursday, September 29th.

To read:

1. Read the next chapter, Ch. 3 “Concrete”, in the Heath brothers’ *Made to Stick*. (If you haven’t already ordered *How We Learn: The Surprising Truth About When, Where, and Why It Happens* by B. Carey, now is the time. We start reading it over next weekend.)

To hand in:

1. Write up a description of the measure that you came up with for the pitching machines. Why is this a good measure? What does it do well? Are there features of the four pitching machines that it misses?
