

## Homework 18

Due by class Monday, April 8th

Readings:

1. [Read Ch 3](#) of A. Ericsson and R. Pool's book *Peak*. This is about 18pp broken into roughly 10 sections.
2. [Read the Introduction and Ch 1](#) of Cal Newport's *Deep Work*. It's about 25pp broken up into 11 sections (where I counted the dashed off sections, not the titled ones).

**To turn in:** Pick a domain of interest to you. This could be your major, could be what you are working on for your self experiment, or could be something else. Describe in as much detail as you can two of the mental representations in that domain.

In this same domain, describe in as much detail as you can what purposeful and deliberate practice would look like. If deliberate practice in the domain isn't possible, explain whether you think there is an intrinsic difficulty or whether this is just because it hasn't developed in that direction yet.
