

## Homework 26

Due by lab Friday, May 8th

### Readings:

1. Read the [second excerpt](#) of Tetlock and Gardners book *Superforecasting*. This is about 19 pp.

**To turn in:** Lab on Friday will be on the Superforecasting reading that we did last week. If you were unable to complete the [first reading](#) from this book, please also try to catch up on that too. Write a three sentence summary of our readings from Superforecasting and turn it into our shared folder.
